Lajois has kept his name constantly before the baseball public because of his exceptional ability as a bail player. He was originally an outfielder, but during the absence of one of the Philadelphia players he was sent to cover second base and performed so well that he was made the regular player in that position.

When the American league was organized Lajoie, owing to his batting ability and his popularity with baseball followers, was made a handsome offer to join the Cleveland club. It is said he was given a three years' contract at the course of the cleveland club. It is said he was given a three years' contract at the capt. 'My idea of a circuit would include the citles of Seattle. Portland, Tacoma, Spokare, Butte, Salt Lake, Boise and Ogden. This is the only hope I can see for Boise getting in the league again. The town is isolated and long jumps in the present circuit make it impossible to consider the penant-winning town unless in such a circuit as I have mentioned Boise break the Salt Lake jump for Portland. The people there are patriotic and want a team. It has been rumored that the players would not get their salaries, but Boise citizens will not let the boys go awny till they have recovered dellar for dollar. "I do not know what President Lucas's plans are for next year, but I am willing to get in and help him. I expect a six club league next year, but after that I have no doubt about there being a Northwest league, including the northern ettles of the Ceast league and the other cities I have mentioned. There will be plenty of hew faces then and I expect we can play about four games in each town each trip away from home and this will keep constant changes of faces and the game will never get thresome. I am sure there will be a good six club circuit here next year and fans will get good ball.

"Bolse won the pennant this year and it has been a good thing for the town, the people have stood back of the proposition and deserved to win first place."

IVER GETS MEDAL.

Beautiful Diamond Trophy Presented to World's Champion.

World's Champion.

A beautiful medal, made of hammered gold and set with a handsome white diamond, costing \$190, has been presented to Iver Lawson, the world's champion bicycle rider. The committee, composed of Harry Heagren, W. D. Rishel, John Chapman and W. E. Samuelson, met with Iver, and in a simple unaffected manner the trophy was presented. Iver made a neat speech in reply, thanking the committee and the cycle fans for the interest they had taken in him. He said that it would always be his aim to uphold the honor of Sait Lake City. On the medal is the following inscription in raised letters.

"Iver Lawson, World's Professional and Amateur Cycling Champion. Presented by Sait Lake Cycle Riders and 'Fans,' Sept. 24, 1804."

'VARSITY TAKES A BRACE. Football Team is Working Hard Prepar-

ing for Saturday's Game.

Ing for Saturday's Game.

A daily run of a mile each evening was yesterday added by Coach Maddock to the regular training system of the University football squad. It is not the Intention of the coach to allow a repetition of the two touchdowns that occurred late in the second half of the game Saturday, because his team did not have the endurance to last the game through.

A contest is scheduled for Saturday next with the National Guard eleven, and the Varsity lads are looked to to put up a very different game from that with Boulder. The team is giving special attention to punting work in order to develop the kicking abilities of new men, to replace Bennion in case he has an off day, such as he had Saturday, Milner, the wonderful new halfback, is showing up good in that line, and may develop into a successful substitute for big Bennion. Another quarterback is badly needed also. Jimmy Wade, who hold down the position Saturday, went into the game with a fever of

over 100, playing merely because there was no one else to put in his place. Several men are being tried out for quarter, but all of them are green so far.

In states where football and high schools are more perfectly developed, a university of the size of that on the hill would receive each year 30 or 40 freshmen, well versed in the rudiments of the game, and ready to be finished off by an expert coach. However, at the University, Coach Maddock has absolutely green men to deal with, and he has to take time teaching them the A B C's of the game instead of the finishing points that win. Another great defect he has to encounter, comes from the rooters. The students hardly know how to support their team. Each night the practice is held before empty bleachers, where one would expect every college man to make it a part of his daily routine to visit the oval during practise and show that he is behind the team. In the games a dead stience comes from the rooting section whenever a critical point is reached, while ordinarily the "hold that line" of the chorus would pull a rattled team together and make it fight for all that was in it.

The game Saturday next is before veterans in the business, and a lively time may be expected.

Balks on Football.

Hamilton, G., Oct. President Guy Potter Benton of Miami university, in a speech to the college students today, ex-pressed strong opposition to football. "I recognize the fact," he said, "that one college could not act alone. It would be dubbed as 'sissy' institution. I would like to see the presidents of all the col-leges get together and abolish the foot-ball business,

l business. I favor athletics and want the boys to Traver athletics and want the boys to have a good time, but football is too hexardous to be justifiable college sport." President Benton's remarks, it is said, were prompted by the injury of several Miami players at Columbus Saturday.

BOWLING LEAGUE FORMED. Composed of Six Teams-Will Play for City Championship.

We are to have another city bowling league, and a series of contests for the city championship. This much was decided upon at a meeting of enthusiasts last exening. Will T. Walker was chosen president of the league. The selection of, secretary and treasurer fell upon Steve Walton, and the executive is composed of Adier. Walton Williams, Enos, A. W. Smith and G. Smith. Each of the six teams will play six games each competing with the other. A schedule will be drawn up in time for the race to begin Monday evening. Capt. 1. M. Barratt has been chosen official umpire.

HORSE RACES THIS WEEK. First Day's Meet at State Vair Began This Afternoon.

Some really line horse races may be looked for at the state tair track all this week. The "News" last evening published the program for today, it consists of a 2:30 tret, and a 2:20 tret, and pace for the harness animals, and a three-eighths mile dash for the runners.

Some of the best horses in the state are entered for the harness events, and a number of fast animals from the outside are ready to start in the running race. The races begin promptly at 2 o'clock and will be run off as quickly as possible. The track is reported to be in splendid condition.

ON THE RACE TRACK. Duryea's Sandria Won the Fillies Stakes

New York, Oct. 3.—H. B. Duryea's Sandria, with 104 pounds up, won the fillier half of the sixth matron stakes of \$13,245 at Morris park today. In doing so she made a new world's record for six furnings straightaway by going the distance in 1:0814. The previous best time, 1:0834, was made by John Boden's Firearms, a 4-year-old carrying 120 pounds, in 1890, and by Endurance by Right, a 2-year-old, 120, in 1901.

Five good fillies faced the starter for Worth \$13,245 Yesterday.

in 1801.

Five good fillies faced the starter for this race. Belle Strome was favorite, Bedouin, an added starter, and quoted at 20 to 1, won the colt's half of the sixth matron stakes of \$12,725. Bedouin took the lead in the first quarter and won driving by a neck from the favorite, Glorifier, Ostrich, carrying ninety-three pounds, in the Jerome handicap, broke the world's record for one and five-sixteenths miles over the hill by running the distance in 2:12. The old mark of 2:14% was made by Sir John in 1891.

PENNY GOSSIP.

There will be a meeting in Social Hall at 8 o'clock this evening for the purpose of organizing an athletic club. Willard Bean is the leading spirit and has some prominent citizens back of the movement.

Duck hunters with empty game backs continue to return from the streams, sloughs and ponds, where the festive bird abounds. Ducks are rapidly becoming non est. Just as long as we have clear weather the birds will be scarce.

Overland racing park Denver was sold yesterday under foreclosure by the sheriff for \$85,000. The purchaser is John C. Mitchell, who represented Henry R. Wolcott, one of the principal creditors. It is reported that the park may be cut up into garden tracts.

In the checker match at the Press club yesterday, Hugh MacKean defeated Henry Heusser, winning the state championship and \$100. Only eight games were necessary, MacKean won four, Heusser one, and three were draws.

President Ban Johnson of the American league has this to say on the Brush statement: "At the joint committee meeting last winter in New York it was the sense of the joint committee that the champion clubs of each league should play for the world's championship. This was understood. I have written a letter to President Pulliam, which he will receive tomorrow, requesting him to assist me in making arrangements for the world's championship games. I have read Brush's statement, and I don't desire to make any comment upon it until after President Pulliam acts."

Lou Houseman, the Chicage sporting writer and promoter of fistics, is in New York seeking a match for his protege, Jack Root, the light heavyweight boxer, who was defeated by George Gardner in this city. Houseman is especially desirous of arranging a meeting with Bob Fitzsimmons for his man, and declares that a sixround bout between the pair can be pulled off at Chicago, next month, when the boxing game will be reopened in that city. Houseman argues that Root, having bested Gardner recently in a six-round contest at Chicago, would be a great drawing card against Lanky Bob in the Windy City. This is doubtless true, for Root is regarded as a wonder in his home city despite his defeat by Gardner in Sait Lake and Fort Erie. In case Fitzsimmons does not look with favor upon the six-round proposition, Root is willing to meet him at Frisco.

A NOTORIOUS CHUNCHUS LEADER AND HIS CAPTORS.

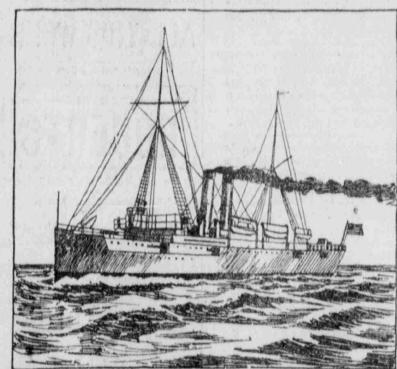

The picture, which is from a photograph taken by a war correspondent in Manchuria, represents Van Chin, a well known and greatly feared chunchus bandit, and the two armed scouts that captured him. This desperado and his band of cutthroats became so lawless and bold in their operations in the vicinity of Viadivostok that a body of mounted volunteer scouts was organized at that city to protect the citizens from their depredations. These chunchuses have made themselves particularly obnoxious to the Russian troops, attacking small detachments of the rear guard and pillaging supply trains which were insufficiently protected. The capture of Van Chin affords much satisfaction to his Russian victims, who regard him as the instigator of most of the atrocities committed in the immediate neighborhood of Viadivostok

LARGEST SUCTION DREDGER IN THE WORLD.

The view shows the bow of the largest suction dredging vessel in the world as she lies in dry dock. The bottom is spoon shaped, so as to allow the dredger to work on a shallow bank. In the center, as shown by the deep shadow, there well or recess into which a great steel pipe may be put. The inboard end of this pipe is connected by a swivel joint to powerful suction pumps driven by engines of 1,000 horsepower. This wonderful machine is an American invention. It will be used to remove the sand from the bars which form at the entrance to some of the principal harbors of the United States.

THE UNITED STATES PROTECTED CRUISER GALVESTON.

The Galveston was one of six vessels to be built under act of March 3, 1899 providing for protected cruisers of 2,500 tons trial displacement. It was to be sheathed and coppered and to have a high rate compatible with good cruising qualities, a great radius of action and was to carry the most powerful ordnance possible to ships of its class. It has an actual steaming radius under full speed of sixteen and a half knots. Its length over all is 309 feet, beam 44 feet and mean draft about 467 tons. It has six boilers, a double bottom and sixty-seven watertight compartments.
